Jonathan plays a game called Gotcha in which he hunts and is hunted by other students with paint guns. After a big win, he goes off for a vacation in France where he meets the sexy Sasha who says she is only interested in him because he is a virgin. She takes him with her to East Germany where they are separated and he has to escape back to the west on his own, all the while being trailed by East German spies. He arrives home only to find the game is still going on, and a canister of film is in his backpack. Then Sasha re-appears. This film has been unfairly condemned by those who are not fans of this type of game. Real gamesmen love this type of film, as much as they love the game itself. I note that this film was based upon the college game of Assassin which used paint-ball guns, and that there is now a successor to this game called StreetWars created in 2004 which uses water pistols and which has been held in New York, San Francisco, Chicago, London and Paris. It is to be hoped that this latest installment of the game will yield a another movie. A Shadowy, Wet World of Squirt-Gun Assassins By MICHAEL Wilson www.nytimes.com/2008/09/27/nyregion/27wars.html I first saw "Gotcha!" in 1985, when it first came out. This is, by far, one of the coolest spy flicks of the 1980's -- way better than all of those generic James Bond movies. The scenes in the DDR will put you on the edge of your seat. Makes you relieved you lived in the U.S. during the Cold War. My favorite Anthony Edwards movie (next to "Revenge of the Nerds"). I just watched it tonight for the first time in a decade, and I have to tell you: It is still as entertaining and slick as it was in 1985. Gotcha is about as devoid of personality as it's possible for a narrative movie to be. a5c7b9f00b
